

LIST OF CORRECTIONS

This publication has been prepared primarily by assembling and binding the maps and tabular materials originally issued in the separate PC(1)-A, B, C, and D final reports for the State. This plan was adopted in order to conserve public funds. The corrections listed below represent changes which would ordinarily have been made if this publication had been prepared by reprinting these maps and tabular materials. Those items with an asterisk (*) consist of

errors which affect not only the specific figure(s) mentioned but also affect other data in this publication. Among the other data which might be involved are the statistics for a larger area of which the particular area is part and the statistics by such classifications as urban-rural residence and size of place. The user can, of course, carry through these types of changes if he thinks them worthwhile.

These pages were reprinted prior to binding of this book, in order to correct the figures in the two columns for "Central cities" and "Other urban" under "Inside standard metropolitan statistical areas." The figures shown here, therefore, supersede those originally published in Final Report PC(1)-150.

Tables 72 and 82*
Due to a tabulating error in the data for Tazewell County, the "Not reported" categories for residence in 1955 and place of work are overstated in several areas. Insofar as feasible, corrected figures are presented below.

Page 280	From	To
Peoria Standard Metropolitan Statistical Area:		
Residence in 1955:		
Different house in U.S.....	118,851	122,355
Moved, residence in 1955 not reported.....	7,559	4,055

The revised figures on place of work were developed utilizing the close association observed in most areas between the numbers of "Not reported" cases for means of transportation and place of work. It was assumed that relatively few workers residing in counties farther away than those listed worked in Tazewell County.

The nonresponse rates for "Birth date, decade unknown" erroneously exclude nonresponses for group quarters members other than inmates.

(Continued on next page)

Pages 454 and 457, tables C-2 and C-3

Delete "Note" at end of tables. Nonresponse allocation rates for family income are somewhat overstated; for a detailed discussion, see text, p. XLIII.

Pages 607-657, tables 122 to 124

On each page showing Male, Operatives and kindred workers, the line reading "Furnacemen, smeltermen, and heaters" should be changed to "Furnacemen, smeltermen, and pourers."

Pages 771 and 774, table D-1

The category "Not reported in decade or year" under "Age" erroneously excludes non-responses on decade of birth for group quarters members other than inmates.

Pages 771 and 774, table D-1

The following explanatory footnote should be keyed to the line for "Not reported" in the section on "Relationship":

Limited to persons who were allocated to the categories "Wife of head," "Other relative of head," or "Nonrelative of head."
